

IM120

12V 120W 'Power-Can' Inverter

The ever popular 120W 'Power-Can' inverter has done away with the 'FM transmitter' in favour of keeping the focus on its main function, reliably converting 12V DC to 240V AC mains power.

It retains the handy 'can-sized' shape still conveniently fitting into your vehicle's drink holder and carries over the very useful 2 Amp USB socket, ideal for charging a myriad of devices including MP3s, iPods, iPads and smart phones.

Features include the handy L.E.D indicators for 'at a glance' information on power and fault warnings, along with an audible alarm to alert the user to any problems. Keeping cool under pressure, the IM120 has an internal heat sink with vented base to keep it powering away effortlessly and efficiently.

With its 300W peak start-up power and continuous 120W output, the 'Power-Can' is your perfect in-vehicle companion for easily powering all your electrical requirements.

Inverter features...

- Cigarette Lighter Plug
- 2 Amp USB charging
- L.E.D Indicators

2 Amp USB Connection
Ideal for charging devices including MP3s, iPods, iPads and mobile phones

Cigarette Lighter Plug
Fuse protected heat resistant plug with high current transfer tip and 0.6m lead

L.E.D Indicators
Power and fault lights with audible alarm if problem is detected

Efficient Design
Internal heat sink with vented base for effective heat dissipation

USB connection provides easy, convenient power

Part No.	IM120
Description	12V 120W Inverter 'Power-Can'
Availability	Ex stock
Carton Qty.	Barcode
1 (retail box)	9315219121202
4 (inner carton)	29315219121206
8 (outer carton)	19315219121209
SPECIFICATIONS:	
OUTPUT POWER	120 Watts Continuous
PEAK POWER	300 Watts
BOOST POWER	200 Watts for 7 mins
NOMINAL VOLTAGE	12 Volts DC
WAVE FORM	Modified Sine Wave
