# TVMS ROGUE POWER CONTROL MODULE

Introducing the TVMS Rogue 12V 40A power control module. Utilising the intuitive RedVision interface, the TVMS Rogue offers a compact and flexible off-grid power control solution.

At just 25mm thick and with in-built smart fuses, the TVMS Rogue is a compact and flexible centralised control solution for caravan, camper and 4x4 applications.

When coupled with the RedVision screen\*, and with 10x 10A dimmable outputs and 8 switch inputs, the TVMS Rogue is ideal for the control of lighting and other low powered devices such as fridges and fans. 2 analogue tank level inputs deliver accurate tank information.

The powerful configurator app, moxex connectors and flexible installation options make TVMS Rogue the perfect accessory control solution, streamlining installation and control.

\*Sold separately. Compatible with DISP4300-RC models manufactured from January 2023, serial numbers beginning with 23. Displays manufactured from July 2022 to January 2023 (serial numbers 2207 - 2212) will be field upgradeable.
