

KINETIC ROPES & HYPER SOFT SHACKLES

Welcoming the HULK 4X4 new Kinetic Ropes and Hyper Soft Shackles

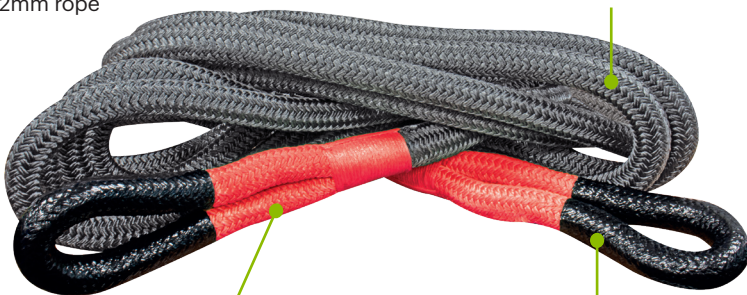

All of the new HULK 4X4 recovery items have been batch-tested in Australia by an accredited NATA testing facility, with all exceeding load rating expectations.

Kinetic Ropes 9M

HU211 13T

22mm rope

100 percent nylon, 30% elasticity for greater recoil during recovery and are built to withstand the toughest recovery tasks.

Braided and coated for durability and long-lasting performance, the ropes feature red or orange ends for high visibility and enhanced safety during operation.

Compatible with both steel and soft shackles, offering flexibility and convenience in usage.

HU210 8.6T

19mm rope

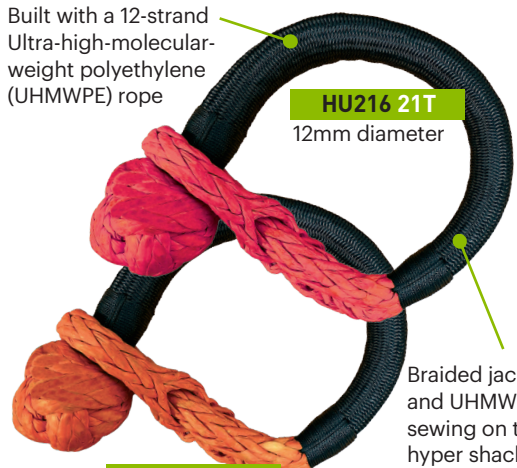

Each set includes a 40L dry storage bag, to help protect the interior of the vehicle from any mud or dirt, which can also be used as a cable damper if required.

Hyper Shackles

Built with a 12-strand Ultra-high-molecular-weight polyethylene (UHMWPE) rope

HU216 21T

12mm diameter

HU215 14T

10mm diameter

Braided jacket and UHMWPE sewing on the hyper shackles enhance their resistance to wear and tear, ultimately extending their lifespan and ensuring durability.

- With a one-piece design, the new HULK 4X4 hyper shackles are incredibly easy to connect and disconnect, saving time and effort during recovery operations.
- Lighter and stronger compared to traditional options.
