

RECHARGEABLE SOLDERING IRON & HEATSHRINK GUN KIT

Part# T04810

New to the Jaylec range is a Rechargeable Soldering Iron and Heatshrink Gun Kit, which is a must-have for any technician working with electrical wires that may require soldering in the workshop or away from the workbench on vehicles.

The flameless and cordless Soldering Iron delivers 4 volts with a maximum temperature of 450 degrees Celsius, while the unit's 2,500mAh Lithium-Ion battery provides up to 45 minutes working time and is easily recharged via USB-C.

With an inbuilt heating and battery capacity indicator, the soldering iron also features an integrated LED light to illuminate dark areas.

Also included within the new kit from Jaylec – is a Heatshrink Gun which is a portable Lithium-Ion heating tool.

Equipped with charging management, circuit control and a fast-

heating speed, as well as a cooling function, the Heatshrink Gun can operate to a maximum temperature of 350 degrees Celsius.

Its 200mAh Lithium-Ion battery is rechargeable via USB-C, with safety and reliability ensured thanks to overvoltage, overcurrent, undervoltage and temperature protection.

Complementary products within this specialised Jaylec range at CoolDrive Auto Parts include resin core solder, heat shrink tubing, crimping tools, fuses and circuit breakers, and an expansive range of terminals, cables and switches.

The Jaylec brand has long been acknowledged as an expert in automotive electrical components, catering to auto electricians, mechanics and workshops looking for high-quality products that get the job done.

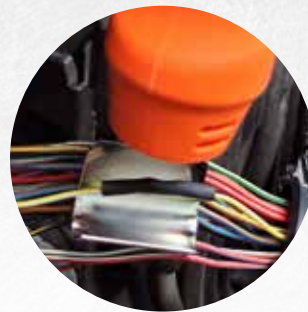

SOLDERING IRON

- Voltage: 4V
- Battery capacity: 2,500mAh Lithium-Ion
 - Preheating time: 60 Sec
 - Working time: about 45mins (±5%)
 - Max temperature: 450 °C
 - USB charging port: Type-C
 - Charging time: 3 hours (5V/1A) with LED working light
 - Battery capacity indication
 - 1pc USB type C charging cable

3.6V MINI HOT AIR GUN

- Voltage: 3.6V
- Battery Capacity: 2,000mAh Lithium-Ion
 - Working time: 15mins
 - Max Temperature: 350 °C
 - Working time: 2 Hours (1A)
 - 1 piece nozzle for hot air gun
 - Battery capacity indication
 - 1pc USB type C charging cable

The portable and flameless Soldering Iron enables soldering work both on the workbench, as well as mobile environments.

A fast re-charging time of under 60 seconds, provides up to 45 minutes working time and a maximum temperature of 450 degrees Celsius gets the job done.

The Heatshrink Gun includes heating and cooling functionality.

Includes handy storage case.
