Introducing our new range of Aunger Trolley Jacks, made specifically for automotive professionals in workshops. These jacks are built for durability, reliability and safety in lifting vehicles. They have a lowered height that allows them to fit under vehicles that have low ground clearance, such as sports cars or modified vehicles, as well as 4x4s.

- Heavy-duty all-steel construction
- Built-in safety overload system to prevent use beyond its capacity
- Complies with the Australian Mandatory Standard AS2615:2016
- Twin-pump mechanism for quick and efficient lifting
- Universal joint release mechanism ensures precise control during operation
- Jacks should be used with suitably rated vehicle support stands to ensure optimal safety

Choose Aunger Trolley Jacks for unparalleled performance, durability, and safety in your automotive workshop.
